

**ANDREW BOOTH** – Chief Financial Officer, STEMCELL TECHNOLOGIES Inc.

Andrew Booth is currently the CFO at STEMCELL Technologies in Vancouver, Canada. STEMCELL is Canada's largest biotech company and designs, develops, and manufactures products used in cellular research around the world. STEMCELL has direct operations in North America, Europe, Southeast Asia and China. Before taking the role of CFO, Andrew led the formation of the Instrumentation Division at STEMCELL.

Prior to joining STEMCELL, Andrew spent approximately 7 years at General Electric in Koln, Paris, New York, Florence and London in a variety of positions and ending in roles leading Business Development (responsible for mergers, acquisitions, & partnerships) for GE Healthcare's Europe, Middle East, & Africa business and GE Healthcare's Life Sciences business. Andrew is also a graduate of GE's Experienced Commercial Leadership Program.

Andrew did his MBA at INSEAD in France and completed his degree in Engineering Physics at UBC receiving the UBC Outstanding Student Award upon graduation. Andrew co-founded Zaber Technologies which designs, produces and sells micro positioning equipment globally. Andrew also worked for Creo Technologies in Vancouver in product design, product management and business development.

Andrew is a recurring mentor for the New Ventures BC business plan competition, and is a member of the fundraising board for Science World in Vancouver. Andrew was named to Business in Vancouver's Top Forty under 40 list in 2012, and he resides in Squamish, BC with his wife Danica and their 4 children.
